"I never, never go down that route," Thompson said. "I think at the end of the day,football jersey design, this draft will be like all the other drafts. There will be some areas that they'll be some strength,baseball jersey, there will be some other areas that are not quite as strong. But at the end of the day, there's going to be 'X' number of players that come into the league that are going to play. Sometimes there are going to be college free agents like a couple we had this year. Sometimes there are going to be first-round picks."

With the 2010 NFL season in the books, nike nba jerseys, it's time to turn our eyes to the NFL draft, and the pre-draft evaluation process. Before the 2011 scouting combine begins on February 24, we'll be taking a closer look at the 40 draft-eligible players who may be the biggest difference-makers when all is said and done.

By Doug Farrar

Pros: Bounds up quickly off the snap and engages well inside. Has a better than average kick-step and dropback in pass protection and has a good arc when keeping edge rushers out of the play and into the pocket. Gets a wide base and turns the corner very well with excellent footwork. Gets to the second level and locks on effectively and quickly; runs like a tight end upfield. Doesn't get consistent pad level, but this is actually an indicator of how well he uses his hands; even when he loses the leverage battle, he can use his hands to fend off defenders. Defends swim and rip moves very well by repositioning and using his short-area agility. Gets outside and blocks out very well in zone situations. Pulls and traps well, though he'll be better with motion-blocking as he develops more inline power.

INDIANAPOLIS -- The scouting combine is all about assessing draft-eligible talent, and there are few NFL executives who have displayed the magic touch when it comes to team-building through the draft process in recent years better than Green Bay Packers general manager Ted Thompson. The Packers and Pittsburgh Steelers are often held up as the primary examples of the importance of using free agency as the frosting on the cake, nike and nfl, while setting the foundation through the draft is key. It's no coincidence that those two teams faced off in Super Bowl XLV.

For Super Bowl champs, nfl customized jersey, the draft is where it starts

The draft is the very definition of an inexact science, but success starts with the fundamentals -- you have to know what your ideals are, custom nba jersey, and you have to know that they work well enough to stake your reputation on them.

According to Thompson, one of the secrets is to avoid getting caught up in which position groups look the strongest in any particular year -- stick to your board and your beliefs on a "no-matter-what" basis.

Another key, as we found out when Thompson took Rodgers in 2005 despite the fact that Brett Favre(notes) was still going strong,make your own mlb jersey, is to make sure that you're built up at key positions before the need makes you do silly things. That's why young players like cornerback Sam Shields(notes) and guard Marshall Newhouse(notes) are being groomed now,hockey jersey display case, behind starters in positions that are still relative strengths.

"Well,nike combat nfl, we watched some tape and we'd been at a workout at Louisiana Tech,nba kids jersey," Thompson said of the process. "He had pretty good numbers on the original workout, signed with Houston, and then was released. I think he was out there on the streets for two months. Then there was a time we brought in some cornerbacks to work out, and he ran really fast, even better than he did at his pro day, and we put him on our practice squad. At the end of the season we signed him as a reserve/future guy. There's nothing unusual about that, but the fact he's a Pro Bowl caliber corner is unusual. He's worked very hard, he's been coached well -- he thinks he's a player and he is a player."

NFL Comparison: Chris Williams, OT,nfl jersey, Chicago Bears

Cons: Smith isn't consistent in power situations - he doesn't cut-block specifically well and he can be bulled back. Size (6-foot-5, 285 pounds) is a concern and probably a root cause - he's going to want to bulk up when he's in the NFL. The upside is that he's got the perfect frame for it. Blocks better and more quickly out of a two-point stance -- this may be a coaching point or a real point of doubt among some teams, but it's something definitely worth mentioning. Tends to wrestle and dance with defensive linemen more than he pops and stops.

Aaron Rodgers(notes) is the most famous draft choice under Thompson, by u basketball jersey, but a quick trip up and down the roster reveals several later-pick success stories. Guard Josh Sitton(notes), Cavaliers Jerseys, categorized by Ndamukong Suh(notes) as the most challenging offensive lineman he's faced, nhl replica jersey, was taken in the fourth round of the 2008 draft. Running back James Starks(notes), boston university hockey jersey, who set the team's running game right in the nick of time for the playoff run that ended in the ultimate victory, was picked up in the sixth round last year.

We continue our series with USC offensive tackle Tyron Smith. Without actually playing left tackle (he did his work on the right side at USC), harvard basketball jersey, Smith is projected as an NFL left tackle prospect due to his athletic ability, and h won the 2010 Morris Trophy, given to the conference's top offensive lineman (and voted on by the conference's defensive linemen), based on his work at right tackle. Smith started 24 games for the Trojans and turned into the pointman up front for a 2010 offense that racked up 189.8 yards per game on the ground and saw just 18 quarterback sacks.

By Doug Farrar

That's always been the way for Thompson, and he learned it a long time ago when he worked under the legendary Ron Wolf in Green Bay in the early 1990s. Thompson later followed Mike Holmgren to Seattle and helped build the team that went to Super Bowl XL, but the Packers got him back in the subsequent regime change. "He's who I went to work for in '92, and he was a strong believer that you build the core of your team around the draft," Thompson said of Wolf on Friday at the scouting combine. "Certainly free agency is another avenue, but you do that a little bit more selectively. That's just the way we were taught."

Even when you don't draft a player,nfl jersey wholesalers, you keep your evaluation database together. That way, a gift from the gods can fall in your lap, as elite cornerback Tramon Williams(notes) did when he was signed as an undrafted free agent in 2007. Cut at one time by the Houston Texans, Williams eventually flourished in Green Bay's pressure-heavy scheme. Former Houston Oilers running back Alonzo Highsmith, who discovered Williams and talked him up enough for Thompson to pull the trigger,NCAA jerseys cheap, won the NFL Scout of the Year award as a result of that and many other discoveries.

The Shutdown 40: #15 - Tyron Smith, OT,nike nfl deal, USC

Conclusion: USC doesn't play a spread offense, but right now, lsu football jersey, Smith projects

best as a pure zone/spread blocker. He's going to have to increase his power and put together a few technique issues, but there's no question that he has the speed and agility to play well in any coordinated motion scheme. The Williams comp is based on his play at this point in time; the question Smith will have to answer is whether he can transcend the size and strength concerns that Williams hasn't,nhl jersey sales, and that USC alum Charles Brown(notes) is still adjusting to in New Orleans. It's a difficult transition, but Smith could be the best of this tackle class down the road if he can make it. He'll most likely tear up the scouting combine drills - the real questions come later.

"With offensive linemen, japanese baseball jerseys, we very much like to have young people on our team, but they have to be prepared to play, just like a lot of guys on our team this year," Thompson said. "But certainly, we think we have some capability, authentic football jersey, as most teams do, of developing offensive linemen. Sometimes it's a smaller school, mesh basketball jerseys, mlb jerseys on sale, sometimes guys that maybe got a late start in college, ireland football jersey, that sort of thing.

That's what the Packers have done over time, and that's why the title is back in Titletown.

"Sam stepped in and did a very fine job for us. And there are a number of guys I can say this about, it's almost to a man, we wouldn't have gotten [to the Super Bowl] without almost every one of the contributions we had this year."

"We feel very strongly that our best policy is to try and draft the best player, because you never know," Thompson concluded. "This whole drafting for need, this isn't fantasy football. As you can tell from our team this year, what you think you have at a position could go away with one sprained ankle or one bad knee or something like that. You think you're all set, but you lose them all in one play in the first quarter of a game. So it just makes more sense to us if we stick with the best possible player we can put on our team, regardless of the position, that's the best policy."
